

Client Testimonials

“The Infrastructure UK vision is to help businesses across the South-East optimise the way they work by integrating innovative communication and collaboration solutions into the heart of their business strategies.”

Our aim is to develop long-term relationships with our clients so we understand how you operate and help you select from our wide range of solutions to specifically meet your needs.

We want to provide the best in global thinking tailored to business growth, whilst offering an accessible and professional team. Our team has 20 years experience in the IT industry and we provide the SME market with an assuring, dynamic and professional service to meet even the highest expectations and standards.

And here's what some of our Clients say...

“We needed to urgently update our communications system in a matter of days due to issues at one of our buildings. Infrastructure UK were recommended to us and provided us with a new solution which was setup impressively fast to fulfil our business needs. This enabled our staff to move into a new office, saving us time and money, whilst ensuring our customers could always keep in touch.

The solution has since proven flexible enough to adapt to our growing needs as they have changed over time.

The consultancy, advice and support we have received from Infrastructure UK throughout has been excellent.”

Chris Newson

Chairman and Chief Executive, Acumen PI

“It was the first time round we deployed a Cisco solution. The first two companies we used provided nothing but rushed engineers, slow unorganised customer service which all led to a whole bunch of unproductive unhappy users.

We then stumbled across Infrastructure UK. Who to date have provided nothing less than first class knowledge, availability and support.

As our need for Unified Communications evolve, so too does our relationship with the guys and girls at Infrastructure UK.

You can't really ask for much more than that!”
